Same Cost, More Capabilities

Do you work with radio frequency (RF) cable trouble-shoots, over-the-air (OTA) wireless communications, analog radio, or electromagnetic interference (EMI) pre-compliance testing? Purchase any qualifying A-Series FieldFox Handheld Analyzer and get two of our most popular software options for free.

Ranging from 4 to 54 GHz, the industry's most integrated handheld analyzer family just gets more powerful. FieldFox provides the greatest accuracy, superior RF performance, a rugged weather resistance package, and complete software upgradeability. And now, you can acquire more application capabilities at no extra charge.

Our Featured Software Options

More software means more flexibility. Arm your FieldFox to meet all your signal analysis needs.

Add these solutions to your field kit:

- Identify the location and nature of faults along cables using time-domain reflectometry (TDR) measurements.
- Attach geolocation tags to measure with a built-in global startup studio network and global positioning system (GPS) receiver.
- Demodulate and characterize radio transmitter amplitude and frequency modulation signals with analog demodulation.
- Measure the unintentional generation, propagation, and reception of electromagnetic energy emissions to fulfill EMI pre-compliance / compliance requirements.
